

DRY NATURAL SWEETENERS

HONEY	Honi-Bake® DRY HONEY POWDER	The original dry honey product. Convenient, delicious and economical, Honi-Bake can be used in breads, cookies, cakes, snack foods, health foods and wherever the natural flavor of honey is desired.
	Sweet 'N' Neat® 2000 DRY HONEY POWDER	Contains 70% honey solids on a dry basis, providing maximum honey flavor in virtually any application: baked goods, cereals, batter/breaders mixes, meat products, compound coatings and all types of dry mix systems.
	Sweet 'N' Neat® 50 SPRAY-DRIED HONEY POWDER	Free-flowing powdered honey produced by spray-drying liquid honey with maltodextrin. Contains 45% honey solids on a dry basis.
MOLASSES	Sweet 'N' Neat® 4000 DRY MOLASSES POWDER	Contains 75% molasses solids on a dry basis, providing maximum flavor and colour impact. Used in a variety of breads, cookies, muffins, gingerbread and other mixes.
	Sweet 'N' Neat® 65 SPRAY-DRIED MOLASSES POWDER	Free-flowing, tan-colored molasses powder produced by spray-drying liquid molasses with maltodextrin. Contains 65% molasses solids on a dry basis.
NUT & SNACK COATINGS	Sweet 'N' Neat® Oil Roast Honey COATING BLENDS	Convenient pre-blend of honey, sugar and salt for coating oil roasted nuts, shelled sunflower seeds, etc. Produces rich, golden brown products that are deliciously sweet and salty, with a touch of honey flavor. Widely used with Sweet 'N' Neat Tack Blend.
OTHER	Sweet 'N' Neat® TACK BLENDS	Dry blends of maltodextrin and lactose that are produced by a patented process and function as the adhesive and browning agent in dry roasted or oil roasted nuts.
	Flaked Products	All of the honey and molasses sweeteners can be produced in flake form with a typical granulation of 70% on #20 mesh USBS sieve. These products provide a crunchy texture in fat-based systems, and are used in specialty food products where the absence of anti-caking agents is desired.
	Custom-Blended Products	If you have a unique product or manufacturing situation, tell us what you need. Our R&D staff will be glad to help develop a product precisely to your specifications.
